

10G SINGLE FIBER XFP

KEY FEATURES AND BENEFITS

Champion ONE's XFP single fiber bi-directional (bidi) product line enables you to double network capacity without running new fiber. By utilizing a single strand of fiber for duplex circuits, our bidi solutions help you reduce test and turn up, as well as fiber lease costs. This savings improves your ability to compete for and service more customers.

Our carrier-grade XFP bidi products also feature digital diagnostics, also known as digital optical monitoring (DOM), which is supported by the majority of switches and routers.
